

## Video Transcript

Hello, my name is David Lee. I'm the president here at Alhambra Medical University. I want to welcome you to our institution. We're trying to provide you a world class environment that has the best resources to be truly leaders in the integrative healthcare setting. We have a new "Doctor of Acupuncture and Integrative Medicine" degree that's going to be available to both English and Chinese students. It is one of the few programs in the country that gives you direct access into health care systems. You're going to be taught by some of the best faculty in the country. The Chinese faculty have some of the most advanced clinical experience, from mainland China, and we can provide you unparalleled access into these kinds of clinical experiences from these professors. It is an extraordinary opportunity, right now, to really advance our profession into the system, coming out of COVID. We believe there is tremendous opportunity for chronic pain management, non-opioid chronic pain management, and these opportunities are ready for us to take our lead. We hope that you can help us lead our profession into the next century, and take our place in the center of the health care system.
